

# AAQ AUTOLIFT AL-PP609 2 POST CAR STACKERS

The AL-PP609 3 car stacker is designed to conveniently allow you to stack 3 vehicles when limited space is available. With a total lifting capacity of 4000kg (2000kg first platform/2000kgs second platform) and a generous headroom between platforms of 1650mm the stacker can store a wide range of vehicles.

## FEATURES

- Space saving and economical solution for car storage
- Simple operation controls
- Single unit suitable for 3 cars storage (no pits required)
- Easy installation, the lift is mounted direct to a concrete hardstand
- Ideal for parking lots such as home, office, car yards, valet parking, car rental and vehicle service centres
- Low profile approach ramps on top and bottom platform
- Low maintenance hydraulic cylinder with chain balance device

## CONCRETE

150mm thick, reinforced, free from cracks/seams, 30mpa & cured 28+ days
