

Workshop Equipment & Service

Inca Lifts QJZ 5.0 5000kg Mechanical Column Hoist

The Inca QJZ 5.0 Mechanical Column Lift is a great asset for any workshop. Its main purpose is for lifting heavy vehicles, assets and equipment for servicing and/or repairs. This product is recommended for trucks, buses, transport and bus workshops, truck and bus builders, heavy vehicle mechanical workshops, mining workshops and more.

Features:

- WorkSafe and AS/NZS 1418.9 Compliant
- Safe Working Distance - Ensuring the asset is a safe distance from the column reduces the risk of asset to column contact should an issue occur with the asset
- Emergency Stop On Every Post - Ensuring the system is able to be stopped instantly to increase operator safety and asset safety in the event of an issue
- Tried and Tested Solution - Utilising a screw drive system the QJZ have proven their reliability for decades, the increases in safety through new materials and improved technology has kept them operating safely
- Easy to Use - Simple and large buttons allow for ease of use by any operator
- Tine Attachments - Ensuring a wide range of asset wheel sizes can be used increasing the versatility of use whether it be a small bus through to large trucks
- Flexibility of Use - Work as a set or individually as required
- Ease of Movement - With operator safety in mind, the hydraulic pallet jack handle is easy to use and ensures when released the post returns to the ground.
- Instant Operation - Cables minimise potential communication delays
- Adjustable Fork Tynes - Ensuring a wide range of asset wheel sizes can be used to increasing the versatility of use wheel sizes can be used increasing the versatility of use whether it be a small bus through to large trucks
- Retractable Wheels - When lifting the front wheels retract into the post to evenly distribute the weight across the whole base of the column
- Ease of Movement - With operator safety in mind, the hydraulic pallet jack handle is easy to use and ensures when released the post returns to the group
