

Workshop Equipment & Service

Inca Lifts KP75 7500kg Wireless Column Hoist

The KP75 is a great asset for any workshop. Its main purpose is for lifting heavy vehicles, assets and equipment for servicing and/or repairs. This product is recommended for trucks, buses, transport and bus workshops, truck and bus builders, heavy vehicle mechanical workshops, mining workshops and more.

Features:

- WorkSafe and AS/NZS 1418.9 Compliant
- Self-levelling and smart safety systems - Ensuring maximum operator, asset and column safety
- Emergency Stop, Easily Accessible Isolators, and Smart Safety System - Ensuring the system is able to be stopped instantly to increase operator safety and asset safety in the event of an issue.
- Safe Working Distance - Ensuring the asset is a safe distance from the column reduces the risk of asset to column contact should an issue occur with the asset.
- Flexibility of Use - Single, Axle or all modes allow the posts to be used as 1, 2 or all (4/6) posts at a time
- Independent Mechanical Locking - Locking latch to engage every 50mm automatically
- Park Functionality - Parking the column on the mechanical locks increased user safety
- Large Screen - Ease of use and visibility
- Wireless Communications - No cables reduces tripping hazards or potential damage to the columns
- Easy to Use - Instructions included one each post ensure users have all the information needed to operate safely
- Adjustable Fork Tynes - Ensuring a wide range of asset wheel sizes can be used to increasing the versatility of use wheel sizes can be used increasing the versatility of use whether it be a small bus through to large trucks
- Retractable Wheels - When lifting the front wheels retract into the post to evenly distribute the weight across the whole base of the column
- Ease of Movement - With operator safety in mind, the hydraulic pallet jack handle is easy to use and ensures when released the post returns to the ground

Workshop Equipment & Service

Inca Lifts KP75 7500kg Wireless Column Hoist

SPECIFICATIONS

KG Per Column	7500kg
4 Columns	30,000kg
6 Columns	45,000kg
Connectivity	Wireless
Operation Voltage	24V
Charging Power	230V/1PH
Clearance from fork to column	250mm
Lifting / Lowering time	100 / 60 sec
Noise level	Max 70db(A)
Max. floor surface pressure	3200kg
Max. distance between columns	12m
Height overall	2250mm
Width overall	1120mm
Lifting height	1705mm
Lifting capacity	7500kg
Net Weight	700kg
