

Workshop Equipment & Service

Inca Lifts KP55 5500kg Wireless Column Hoist

The KP55 is a great asset for any workshop. It lifts heavy vehicles, assets and equipment for servicing and/or repairs. The KP55 is recommended for trucks, buses, transport and bus workshops, truck and bus builders, heavy vehicle mechanical workshops, mining workshops and more.

Features:

- WorkSafe and AS/NZS 1418.9 Compliant
- Smart Safety Systems and Safe Levelling Features - We maximise our operators, assets and columns safety
- Easily Accessible Isolators, Smart Safety System and Emergency Stop - To ensure operator safety and asset safety in the event of an issue, the system should be able to stop instantly.
- Working Distance Safety Precaution - Long arms means the asset should be a safe distance from the column to reduce the risk of the asset touching the column should an issue occur with the asset.
- Flexibility of Use - Single, Axle or all modes allow the posts to be used as 1, 2 or all (4/6) posts at a time
- Park Functionality System - Having the ability to park the column on the mechanical locks increases user safety.
- Large Screen - Ease of use and visibility
- Wireless Communications - No cables reduces tripping hazards or potential damage to the columns
- Easy to Use - Instructions included one for each post to ensure users have all the information needed to operate safely
- Adjustable Fork Tynes - Ensuring a wide range of asset wheel sizes can be used to increase the versatility of use whether it be a small bus through to large trucks
- Retractable Wheels - When lifting the front wheels retract into the post to evenly distribute the weight across the whole base of the column
- Ease of Movement - With operator safety in mind, the hydraulic pallet jack handle is easy to use and ensures when released the post returns to the ground
- Accessible Charging - Utilising a standard 230v 1 Phase power point

Workshop Equipment & Service

Inca Lifts KP55 5500kg Wireless Column Hoist

SPECIFICATIONS

KG Per Column	5500kg
4 Columns	22,000kg
6 Columns	33,000kg
Connectivity	Wireless
Operation Voltage	24V
Charging Power	230V/1PH
Clearance from fork to column	236mm
Lifting / Lowering time	75 / 60 sec
Noise level	Max 70db(A)
Max. floor surface pressure	3200kg
Max. distance between columns	12m
Height overall	2250mm
Width overall	1120mm
Lifting height	1705mm
Lifting capacity	5500kg
Net Weight	546kg
